

Construction Management Technology

This curriculum is designed to prepare individuals to apply technical knowledge and skills to the fields of construction, construction management, and other associated professions.

Course work includes instruction in sustainable building and design, print reading, building codes, estimating, construction materials and methods, and other topics related to design and construction occupations.

Graduates of this pathway should qualify for entry-level jobs in construction, and trades professions, as well as positions in industry and government.

This program prepares individuals to supervise, manage and inspect construction sites, buildings, and associated facilities. It includes instruction in site safety, personnel supervision, labor relations, diversity training, construction documentation, scheduling, resource and cost control, bid strategies, rework prevention, construction insurance and bonding, accident management and investigation, applicable law and regulations, and communication skills.

For specific information about potential positions and wages in construction management employment, visit the Central Piedmont Career Coach website.
